

DSP925

30W Coaxial Commercial In-ceiling Speaker with Power Tap

Description

The DSP925 30W Coaxial Commercial In-ceiling Speaker with Power Tap is designed for public address and background music systems, delivering clear and consistent audio performance in distributed sound environments.

Equipped with a 4-inch woofer and a 0.75-inch tweeter, it provides balanced full-range sound with a frequency response of 80Hz–20kHz and a maximum sound pressure level of up to 105dB. The integrated rear enclosure enhances acoustic stability and reduces sound leakage, ensuring reliable performance across various installation conditions.

Features

- 30W coaxial ceiling speaker designed for background music and PA applications.
- 4-inch woofer combined with a 0.75-inch tweeter for balanced and clear sound reproduction.
- Wide frequency response (80Hz–20kHz) and max SPL up to 105dB for effective sound coverage.
- Coaxial driver structure ensures consistent sound dispersion and improved listening experience.
- High-quality paper cone driver manufactured with optimized processing for stable tonal performance.
- Integrated metal back cover improves acoustic performance and minimizes sound leakage.
- Durable engineering plastic front panel with corrosion-resistant rear enclosure for long-term reliability.

Specifications

Model		DSP925
Speaker Unit		4"×1, 0.75"×1
Rated Power (RMS)		30W
Input	70V	3.75W-7.5W-15W-30W
	100V	7.5W-15W-30W-*
	8Ω	30W
Sensitivity (1m, 1W)		90dB±2dB
MAX. SPL. (1m)		105dB±2dB
Frequency Response		80Hz~20kHz
Dimensions (W×H)		∅ 205×215mm
Weight		2.5kg
